

S.P. KOWSALYA

Madurai, Tamil Nadu | 9361563676 | kowsisp47@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

MCA candidate with a strong foundation in Python, SQL, Data Structures, Object-Oriented Programming, Machine Learning, and Web Development. Skilled in developing responsive web applications and CNN-based computer vision solutions. Seeking an entry-level Software Engineer, Python Developer, or Full Stack Developer role to contribute to innovative software solutions.

KEY ACHIEVEMENTS

95%

CNN Model Accuracy

40%

Web Performance Boost

1,000+

Financial Transactions

8.40 / 10

MCA CGPA (Top Student)

TECHNICAL SKILLS

Programming Languages: Python, Java, C

Web Technologies: HTML5, CSS3, JavaScript, Bootstrap

Databases: MySQL, MongoDB

AI/ML: TensorFlow, OpenCV, NumPy

Libraries and Tools: Git, GitHub, VS Code

Core Concepts: Data Structures, OOP, DBMS, Machine Learning, CNN, Problem Solving

EDUCATION

Master of Computer Applications (MCA) — V.V.Vanniaiperumal College for Women, Madurai Kamaraj University 2024 to 2026

CGPA: 8.40 / 10 (Up to 3rd Semester)

B.Com in Computer Applications — V.V.Vanniaiperumal College for Women, Madurai Kamaraj University 2021 to 2024

CGPA: 8.1 / 10 | First Class | Gold Medalist

INTERNSHIP EXPERIENCE

Website Development Intern — GETIN Technologies May 2025 to June 2025

- Built 3 or more responsive web applications using HTML, CSS, and JavaScript, reducing page load time by 40% through optimized layouts.
- Created a bus booking interface inspired by RedBus, serving 100 or more user flows and improving UI clarity and frontend usability.
- Collaborated with the development team to implement structured, mobile-friendly designs across 5 or more web pages.

PROJECTS

CNN Driven Road Surface Defect Detection and Severity Evaluation

- Engineered a CNN based deep learning model achieving 95% accuracy in detecting and classifying road surface defects from images.
- Applied preprocessing techniques including resizing, normalization, and noise reduction to improve model performance by 15%.
- Implemented three-level severity classification to categorize cracks by damage level using Python, OpenCV, NumPy, and TensorFlow.

Expense Tracker Web Application

- Built a full stack web application enabling users to track, add, modify, and delete daily income and expense records efficiently.
- Crafted a responsive user interface using HTML, CSS, JavaScript, and Bootstrap, supporting seamless use across all screen sizes.

Shop Annual Accounting System

- Managed inventory, payroll, and taxation using Tally ERP, processing and maintaining over 1,000 financial transactions accurately.

ACHIEVEMENTS

- Gold Medalist in B.Com Computer Applications, ranked 1st in the department for academic excellence.
- Secured 3rd place in Intercollegiate Quiz Competition among 10 or more participating colleges.
- Won multiple Intercollegiate Adzap Competitions, demonstrating creativity and communication skills.
- Awarded Proficiency Prizes in 1st and 2nd year for outstanding academic performance.

CERTIFICATIONS

- Tata GenAI Powered Data Analytics Job Simulation, Forge, June 2026: Completed tasks in exploratory data analysis, risk profiling, AI based delinquency prediction, and data storytelling for collections strategy.
- HackerRank: Python, Problem Solving, Java, and Software Engineer certifications.
- Microsoft Learnathon | NoviTech Data Analytics | MongoDB | NPTEL | Coursera UX Design | Wadhvani Foundation.
